

SRVH Healthy Pet Program

The Santa Rosa Veterinary Hospital is introducing the “SRVH Healthy Pet Program” for our patients. This program will make high quality veterinary care more easily affordable. Our plans bundle the services that our patients need to keep them in the best of health into a single package. Each package provides a significant discount, and then arranges for simple monthly payments.

Our Healthy Pet Program is not an insurance plan, as there are many available today. Instead our program is designed to provide for the more routine care that our patients need most often: Healthy pet examinations, vaccines, routine blood test, parasite control, spay/neuter services; care that is often not covered by basic insurance plans.

All plans are based on the fact that with unlimited examinations at any time, you will be unlikely to allow any issues to fester and become serious. Our goal is to “foster wellness” and to prevent future illnesses.

Ask us how we can help your pet today.
